Removable Access Tool (a.k.a. Ratool) is a simple to use portable freeware application which aids in the control of external storage devices such as USB flash drives, CD/DVD drives, as well as floppy, tape and WPD devices. Ratool can disable USB storage access or enable write protection on all USB flash drives, thus preventing data from being modified or deleted, protecting your confidential data from being copied by others.

There are many such tools available online, but they are often easily circumvented. For example, if you use one of these USB disablers to disable a flash drive, someone could simply use another tool and enable it again. This means these tools are not actually protecting your USB ports, which is why we created Ratool. By using Ratool, you won't have to worry about this, as other tools cannot easily break Ratool's protection.

Our Software

-  Dns jumper - 2204757
-  Easy Context Menu - 242504
-  Firewall App Blocker - 201712
-  BlueLife Hosts Editor - 181519
-  Easy Service Optimizer - 179880
-  ReIcon - 165329
-  DNS Angel - 152756 **New**
-  Windows Update Blocker - 129314
-  Ntfs Drive Protection - 105860
-  Ratool - 105543
-  Oemu Simple Boot - 103447

Ratool v1.3 What is new: (21.05.2015)

1. **[Fixed]** – After blocking all usb storage devices, clicking “non used usb device”, would reset all restrictions – Lock settings should be chosen (critical)
2. **[Fixed]** – inaccessibility of Usbstor service causes an ownership problem (rare)
3. **[Fixed]** – Some minor BUGS
4. **[Added]** – “Prevent Installation of USB Devices” feature added. This feature allows you to block all USB Devices except yours (i.e. a white list)

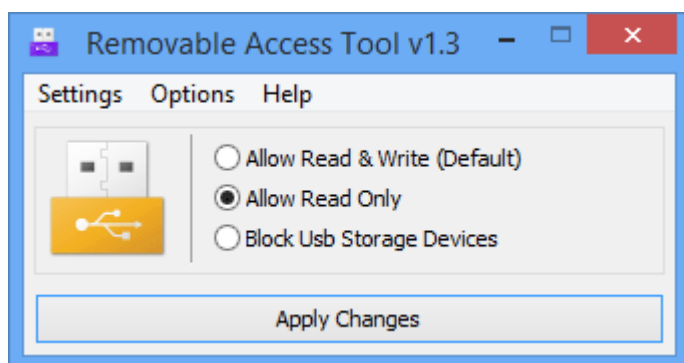

Ratool allows the following actions:

1. Block USB Storage Devices: disables all USB storage devices access to your PC

How to block all USB devices except yours

- a. Plug in Your USB device (You can plug in more than one)
 - b. In the Options menu, click “Prevent Installation of USB devices”
Currently plugged in devices will be excluded (allowed), all other USB devices will be blocked.
2. Allow Read Only: Makes USB storage devices Read-Only. Write access is disabled. In certain situations, you may wish to prevent data from being written to the device.

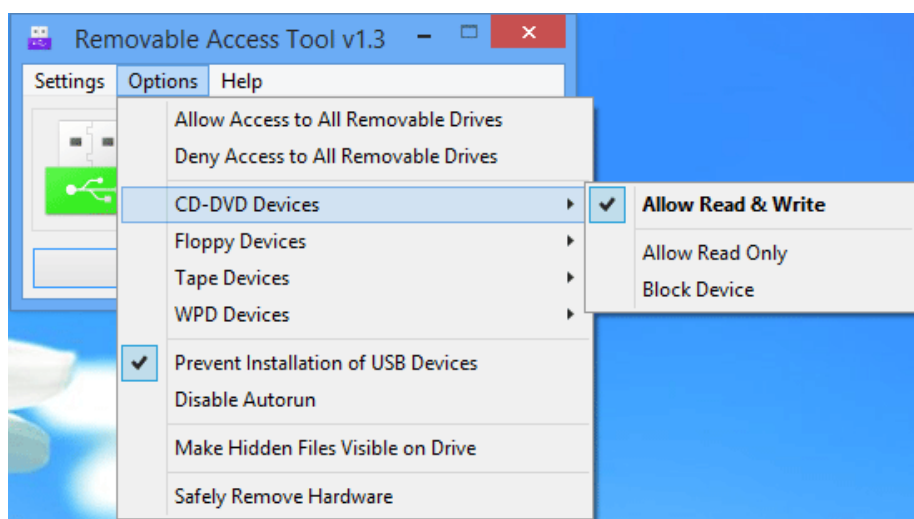

3. Allow Read & Write (Default): resets everything back to normal so that USB storage devices function normally.

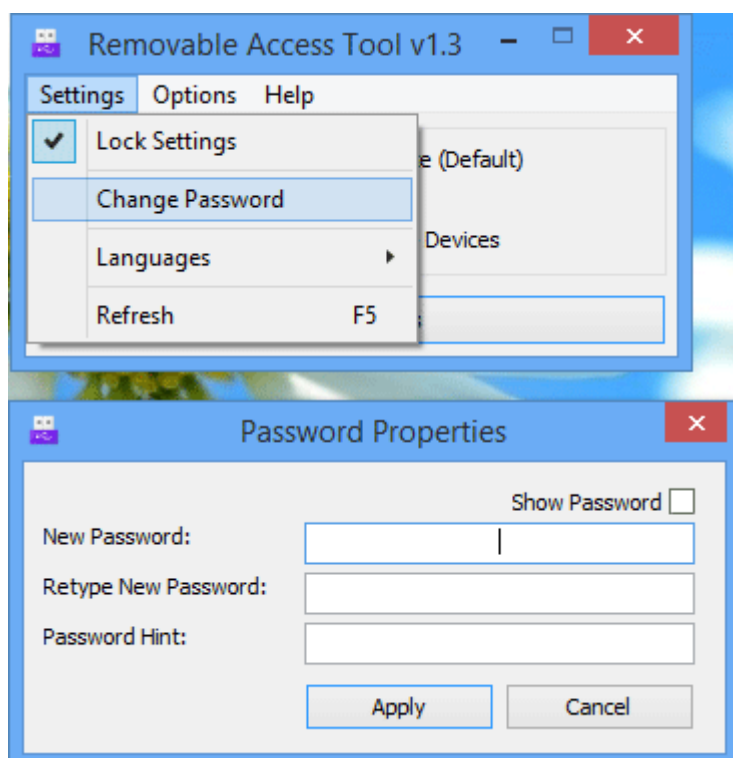

- Qemu Simple Boot - 103447
- WebCam On-Off - 96792
- AskAdmin - 95082
- 6to4 Remover - 84324
- Reg Converter - 64879

 [Translate](#) : Google - Yandex - Microsoft

36 User online
 79 queries in 0.253 seconds.

6. Also under Settings is the option to switch languages (English, German and Turkish are pre-installed). The Translate option allows you to edit the language and translate the GUI into your own language

The Translate window allows you to translate each row individually

1. Select your own language (this is important for setting the correct language ID)
2. In the Your Translation field, type your translation. (for example, if your language is Japanese, type Japanese words)
3. If you wish, you can save the translation
4. Click the 'Copy to Clipboard' button
5. Finally, click the "Send translated data" button to send us your translation

Supported Operating Systems: Windows 10 , Windows 8.1 , Windows 8 , Windows 7 , Windows Vista , Winsows xp – Not fully featured (both x86 and x64)

Supported Languages: English , Turkish , German , Japanese , Persian , Vietnamese , Russian , Ukrainian , Hungarian , Greek , Arabic , Simplified Chinese , Chinese Traditional , Swedish , French , Polish , Spanish , Italian , Korean , Serbian , Portuguese , Indonesian , Uyghur , Thai , Slovenian

Do previous versions support winxp, and if so where can we download those from?

Author | June 20, 2018

Please check your email.

chii | June 19, 2018

Hi please help me. message show "Access is denied" then I'm going to use removable devices. I have already finished the click of allow read & write.
I'm japanese. Pardon my broken English.

chie | June 19, 2018

Hi, Thank you for this great program but help me.
1, Block USB storage devices.
2, Apply Changes clicked.
3, Allow Read & Write chose and clicked but don't use all removable device.
When was going to use USB; "Access is denied". message was displayed.
please help me.

I'm japanese. Thank you for trying to understand my poor English.

Hi what about keyboard and mouse?

Francisco Javier | February 21, 2018

When Windows 10 update itself the ratool is deleted and need to be reinstaled. There is any way to avoid this? In our case it happend last time with Windows 10 Creators Update.

Author | February 15, 2018

Maybe next version, thanks for your comment

sistsoga | February 14, 2018

Thanks a lot! Great program!!! The best!
Is posible user command line options or command line version??

It would be nice !!

carlo ondorsi | November 16, 2017

I would like to know if possible, give command line options.

Gerrit Smit | November 15, 2017

command line options or command line version would be nice 😊

carlo ondorsi | November 14, 2017

commad line ?

Igor | October 26, 2017

Hi

I unzipped the file to the USB flash drive. Put the "Allow only reading" mode. But the files from the USB flash drive can be copied. How do I make it so that I can not copy the files? I will add that it is not possible to delete files from the USB flash drive, and copying to the USB flash drive is also not possible. Why then can I copy it from a USB flash drive to a computer?

Tarik | October 11, 2017

Great tool. Thanks a lot.

MURAT AYDEMİR [TRWE_2012] | October 2, 2017

Looks like a different app, I'll definitely try it

Author | August 30, 2017

Could you please try it in safe mode
